Life Made Easy With **SAM**

SAM is the most user-friendly and flexible smart home automation system available in the market. With its advanced technology, easy-to-use features, and sleek design, SAM is the perfect home buddy for everyone!

It co-functions smoothly with existing gadgets and appliances through its devices. Its features guarantee you that SAM is the best home automation solution that will help transition your traditional home or office to a smart space ecosystem conducive to your fast-paced lifestyle.

MEET SAM

SAM is Simple.

SAM is a hub to control home and office devices and appliances in just one click of a button. Although straightforward in design, it is flexible enough to be customized based on your preferences.

Don't be limited to the basic package you get. If you enjoy the comfort of having SAM to safeguard your home, you're assured that we are consistently innovating products that you can add to your expanding automated home. Get your smart devices in bundle or solo; the choice is up to you! Grow your devices as you go.

Add according to your lifestyle: how you want to live, how you want to be comfortable.

SAM is Automated.

SAM automates your home and integrates its system to devices in your home or office. Unlike other smart home systems, you can link SAM to your existing appliances at home and avoid the extra cost of buying devices that are compatible to your home automation system. No need to change your appliances, we'll adjust to your current home or office situation! Get our basic package, plug in your home appliances, and control them from your mobile phone or tablet! It's so easy!

SAM is Mobile.

SAM allows you to remotely control your home or office from anywhere in the world through your mobile phone and tablet. Secure and monitor your home by receiving alarms and notifications, and view videos real-time - whether you're driving, having lunch, partying late at night, or on your dream vacation. It's like being home away from home.

Why SAM?

SAM allows you to remotely control your home or office through your mobile phone and tablet. Secure and monitor your home by receiving alarms and notifications, and view videos real-time.

CONVENIENCE

SAM streamlines common tasks through your mobile phone or tablet such as opening the lights, closing the doors, shutting the blinds, and controlling cooling systems. The app is easy to install and learn; SAM's smart devices are easy to set up and connect to the gateway, making home automation uncomplicated and easily utilized whenever, wherever.

EASY TO USE

SAM's technology is so simple to use! The app is very straightforward in design and can be customized according to your preference. Turn on/off all your smart devices in just one click of a button! Create scenes specific to your needs. Connect your appliances to SAM's devices and control them easily through your app.

INTEROPERABILITY

SAM's gateway does not exclusively function with its smart devices. SAM can connect to existing gadgets and appliances and control them through the app on your mobile phones and tablets.

EXPANDABILITY

SAM has a wide array of products that can be added to the basic package depending on your preferences and requirements. SAM's main controller, the gateway can easily connect to these devices and sync them automatically to the app.

SECURITY

SAM can also function as an advanced security system by installing cameras and motion sensors that can be monitored and viewed through the user's mobile phone or tablet. It also uses key cards or fingerprint identification in place of conventional locks, making it harder for someone to break in.

ENERGY SAVING

SAM can monitor energy consumption and adjust energy usage depending on your inclination – turn on/off lights, automatically shut down devices, and set a limit to the air conditioner's temperature.

CONNECTIVITY

SAM enables you to monitor and control most of your home or office appliances such as lights, windows, doors, security locks, audio and video equipment, sensors, and curtains. These devices can also be interlinked with one another to have customized functionality based on your preferences.

ACCESSIBILITY

SAM's smart devices can be controlled from anywhere through your mobile phone or tablet. No need to be in close proximity for the devices to be regulated, a simple Wi-Fi or data connection will enable the app to access and control the smart devices.

FLEXIBILITY

SAM can be controlled through multiple devices such as mobile phone, tablet, and its own remote control pad, depending on the user's preference.

AESTHETIC DESIGN

SAM's design is sleek and minimalist – it can aesthetically fit in any space.
